Enabling “Always-On” Display on Your Moto 360 (3rd Gen)

Inas B. - 2025-10-13 - Troubleshooting & Setup

The Moto 360 (3rd Gen) offers an **“Always-On” display** feature, keeping your watch face visible at all times while balancing power efficiency. Here’s how to enable or disable it for a personalized experience.

Step-by-Step Guide:

1. **Access Quick Settings:**
    - Swipe down from the top of your watch screen to reveal the Quick Settings menu.
2. **Open Display Settings:**
    - Tap **Settings** in the Quick Settings panel.
3. **Select Display Options:**
    - Within Settings, navigate to **Display** to access display-related preferences.
4. **Toggle “Always-On”:**
    - Scroll to the bottom of the Display settings.
    - Tap **Always-On** to enable or disable the feature according to your preference.

With this simple adjustment, your Moto 360 can display the watch face continuously or save battery by turning off the screen when not in use—giving you complete control over your smartwatch experience.
