How to Update the Software on Your Moto Watch 40

Inas B. - 2025-10-10 - Troubleshooting & Setup

Keeping your **Moto Watch 40** up-to-date ensures optimal performance and access to new features. Follow these steps to update your watch:

Step 1: Automatic Download

When a software update is available, it will automatically download to your watch through the **Moto Watch Lite app**. You'll receive a notification in the app when the update is ready for installation.

Step 2: Install the Update

Once the update is downloaded:

1. Tap **Download and Install** on the app notification.
2. The update will begin, and your watch will restart automatically once completed.

Step 3: Manual Installation (If Needed)

If you don't get a notification:

1. Open the **Play Store (Android)** or **App Store (iOS)**.
2. Search for **Moto Watch Lite**.
3. If an app update is available, download and install it.
4. Once updated, your watch will automatically sync the latest software.
