Time Syncing on the Moto Watch 40

Inas B. - 2025-10-10 - Product Features

The **Moto Watch 40** keeps your schedule precise with automatic time syncing. Once paired with your phone, the watch updates its time in real-time to match your phone's time zone and settings. This ensures your watch is always accurate, even when traveling across time zones or adjusting for daylight saving time.

Automatic Syncing: After pairing, your Moto Watch 40 automatically aligns with your phone's time. There's no need to manually set the time—the watch adjusts itself whenever your phone's settings change.

No Manual Adjustment Needed: All time changes are managed through your phone, maintaining consistency between your devices and eliminating any confusion.

Troubleshooting: If you notice your watch time isn't syncing correctly, contact the Moto Watch support team. They are ready to assist with any time-related issues.

With automatic syncing, the Moto Watch 40 ensures your watch is always accurate, reliable, and hassle-free.
