Accurate Activity Tracking with Your Moto 360 Gen 3

Inas B. - 2025-10-08 - [Product Features](#)

Your Moto 360 (Gen 3) is designed to make activity tracking effortless. With a **built-in GPS** and **barometric altimeter**, you can monitor workouts, runs, and outdoor adventures **without needing your phone**.

Tips for Optimal GPS Performance

1. Clear Sky Visibility

- Ensure you have a **direct line of sight to the sky**. This allows your watch to lock onto GPS satellites quickly and accurately.

2. Avoid Obstructions

- Stay away from tall buildings, dense trees, or large structures that may interfere with GPS signals.

3. Quick GPS Acquisition

- For faster GPS locking, briefly **remove the watch from your wrist** and hold it until the GPS signal is acquired.

By following these simple tips, your Moto 360 Gen 3 delivers **precise and reliable activity tracking**, letting you focus on your performance, not your device.
