Brightness Control on Your Moto360

Inas B. - 2025-10-08 - Product Features

Customize your Moto360's screen brightness to balance visibility and battery life. Whether you prefer an always-on display or a more energy-saving approach, here's how to adjust it.

Adjusting from Your Phone

1. Open the **Wear OS** app on your smartphone.
2. Tap **Advanced settings.**
3. Toggle **Always-on** to keep the screen visible or turn it off for a more conservative approach.

Adjusting Directly on Your Watch

1. Tap the screen to wake your watch.
2. Swipe down from the top of the screen.
3. Tap **Settings → Display.**
4. At the bottom, toggle **Always-on** on or off to match your preference.

Temporarily Turn Off the Screen

1. Wake your watch by tapping the screen.
2. Swipe down from the top.
3. Tap **Theatre mode** to turn off the display temporarily.
4. Press the power button once to reactivate the screen.

Adjust Display Brightness

1. Wake your watch by tapping the screen.
2. Swipe down from the top.
3. Tap **Settings → Display → Adjust the brightness.**
4. Tap to select your preferred brightness level.

Tip for Better Battery Life

Allow your screen to turn off when not in use. You can manage the **Always-on** feature via the Wear OS app or directly on your Moto360.

With these settings, your Moto360 will adapt to your lifestyle, giving you the perfect mix of visibility and energy efficiency.
