Effortless Pairing: Connect Your Moto Watch 40 to Your Phone

Inas B. - 2025-10-10 - [Troubleshooting & Setup](#)

Getting your **Moto Watch 40** up and running is quick and easy. Follow these simple steps, and you'll be ready to enjoy a fully connected experience in no time.

Step 1: Get the Moto Watch Lite App

Start by downloading the **Moto Watch Lite app** on your phone. It works with both Android and iOS.

- Not installed yet? Grab it from **Google Play** or the **Apple App Store**, or scan the QR code that came with your watch.

Step 2: Turn On Bluetooth

Make sure Bluetooth is enabled on your phone—this lets your watch communicate seamlessly with your device.

Step 3: Start Pairing

Open the **Moto Watch Lite app** and tap **"Add Watch"**. The app will guide you through the setup process step by step.

Step 4: Select Your Model

From the list of available devices, choose **"Moto Watch 40"**.

Step 5: Identify Your Watch

The app shows nearby watches with IDs like **"Moto Watch 40-XXXX"**. The last four digits are unique to your device.

Step 6: Verify the MAC Address

On your watch:

- Swipe down to access **Quick Settings**.
- Tap **Settings** → **About** to see the last four digits of your MAC address.

Match these with the ID in the app.

Step 7: Confirm Pairing

Select your device in the app. When you see **"Pairing Successful"**, your watch is ready to go!

Tip: Avoid pairing manually through your phone's Bluetooth settings—always use the app first. It makes setup smoother and ensures everything syncs correctly.
