Integrating Strava with the Moto Watch App

Inas B. - 2025-10-08 - [Troubleshooting & Setup](#)

Strava is a popular fitness tracking platform that can be connected to the Moto Watch app. Follow these steps to set up the integration:

1. **Open the Moto Watch App** - Launch the app on your mobile device.
2. **Access Your Profile** - Tap your profile within the app.
3. **Connected Apps** - Look for the **Connected Apps** option in your profile settings.
4. **Enable Strava** - Tap **Enable Strava** to start the connection process.
5. **Log In to Strava** - You will be redirected to the Strava website; log in to your account.
6. **Authorize Connection** - Follow the prompts to authorize your Moto Watch to sync with Strava.
7. **Confirmation** - If successful, a confirmation message will appear, and you may be redirected back to the Moto Watch app.

Once connected, your workouts on the Moto Watch will automatically sync with Strava, allowing you to track and share your activities while enjoying Strava's performance analysis and community features.
