# Moto360 Voice Recognition Troubleshooting

Inas B. - 2025-10-13 - [Troubleshooting & Setup](#)

Having trouble with voice recognition on your Moto360? Follow these steps to get it working smoothly:

## 1. Adjust Language

- Set both your **phone and watch** to **English (US)**.
- Changing your phone's language should automatically update your watch.

## 2. Check Microphone & Speaker

- Ensure the **microphone is unobstructed**.
- Confirm the **speaker is working correctly**.

## 3. Verify Internet Connection

- Voice recognition requires a stable connection. Make sure **Wi-Fi or mobile data** is active.

## 4. Reboot Devices

- Restart both your **phone and Moto360** to refresh the system.

## 5. Update Google Assistant

- Make sure Google Assistant is **up to date** via the Play Store → **My Apps**.

## 6. Clear Cache & Data

- In the Wear OS app on your phone:  
**Settings → Apps → Wear OS → Storage → Clear Cache & Clear Data**

## 7. Retrain Voice Model

- Go to **Google Assistant settings** on your phone to retrain your voice model.

## 8. Check for System Updates

- Ensure both your **Moto360 and phone** have the latest updates installed.

## 9. Reset Google Assistant

- Open the **Google app** → **More** → **Settings** → **Google Assistant** → **General** → **Devices** → **select your watch** → **Remove device**

## 10. Factory Reset (Last Resort)

- Backup your data before performing a **factory reset** on your Moto360.
