# Unpairing Your Moto 360 from Your Phone

Inas B. - 2025-10-13 - [Troubleshooting & Setup](#)

Switching to a new phone or simply starting fresh? Unpairing your Moto 360 is straightforward and ensures your watch is ready for a new connection. Follow these steps for a smooth process.

## Steps to Unpair Your Moto 360

### 1. Open the Wear OS App:

- Launch the **Wear OS by Google** app on your smartphone.

### 2. Access Advanced Settings:

- Scroll down and tap **Advanced Settings**.

### 3. Change Device Settings:

- Tap **Change Device Settings** under the Advanced Settings menu.

### 4. Initiate Unpairing:

- Select **Unpair Watch** to start the process.

**Note:** Unpairing your Moto 360 will trigger a **factory reset**, restoring the watch to its default settings.

## Important Considerations

- **Data Removal:** All user data and settings stored on the Moto 360 will be erased.
- **Wear OS App Update:** Information about the watch will also be removed from the Wear OS app on your previous phone.
- **New Device Ready:** After unpairing, your Moto 360 is prepared for pairing with a new device.

With these simple steps, you can confidently unpair your Moto 360 and start fresh, ensuring a seamless transition to a new smartphone.
