Water Resistance (IP67 Rating) for Moto Watch 70

Inas B. - 2025-10-08 - Product Features

The Moto Watch 70 has an IP67 rating for water and dust resistance, but it is **not waterproof**. It can withstand brief immersion in water but is **not suitable** for high-pressure water activities or extreme conditions.

IP67 Rating Explained:

- **IP:** Ingress Protection (protection against solids and liquids).
- **6 (Dust):** Fully protected against dust.
- **7 (Water):** Can be submerged in up to 1 meter (3.3 ft) of water for 30 minutes.

Usage Guidelines:

- **Safe:** Rain, handwashing, shallow water for short periods.
- **Avoid:** High-pressure water sports (jet skiing, water skiing), soaps, chemicals, perfumes, insect repellents, saunas, steam rooms, and prolonged immersion.

After Water Exposure:

1. **Dry Thoroughly:** Use a soft, lint-free cloth. Avoid direct heat or sunlight.
2. **Before Charging:** Ensure the watch and charging port are completely dry.
3. **After Saltwater:** Rinse with fresh water and dry thoroughly.
4. **After Sweat:** Wipe down the watch to prevent corrosion.

Key Takeaways:

- Resistant to dust and brief water immersion.
- Avoid high-pressure water, chemicals, soaps, and extreme heat.
- Always dry the watch thoroughly after water exposure.

Following these tips ensures your Moto Watch 70 maintains durability and reliable performance.
