WeChat Connectivity on Your Moto360

Inas B. - 2025-10-13 - Product Features

Stay connected with your social circles even if WeChat doesn't have a dedicated Wear OS app. Here's how to make the most of WeChat notifications on your Moto360.

Installing WeChat via Wear Installer

1. Use **Wear Installer** on your Android phone to install WeChat directly on your watch.
2. Open Wear Installer, find WeChat, and install it on your Moto360.

Notification Visibility

- Notifications from WeChat on your phone will automatically appear on your Moto360.
- Android users can reply to messages directly from the watch.

iOS Users: Notification Settings

- Notifications not shown on your iPhone's lock screen may not appear on the watch.
- Ensure WeChat notifications are enabled in the **Wear OS app → Notifications**.

Granting Notification Access

- Make sure WeChat has notification access in the Wear OS app on your phone.
- Open the Wear OS app, go to **Notification settings**, and enable WeChat.

Optimizing Notification Experience

- **iOS users:** Enable notifications on your lock screen to see them on the watch.
- **Android users:** Notifications should appear and be actionable directly from your Moto360.

By following these steps, your WeChat notifications will flow smoothly on your Moto360. For any persistent issues, contact support — we're here to keep your smartwatch experience seamless.
