How to Pair Your Moto Watch 120 with the Moto Watch Lite App

Inas B. - 2025-10-10 - Troubleshooting & Setup

Pairing your **Moto Watch 120** with the **Moto Watch Lite app** is quick and easy. Just follow these steps, and you'll be set up in no time.

1. Install the App

Download the **Moto Watch Lite** app from your app store — it's available for both **Android** and **iOS**.
You can also scan the **QR code** shown on your watch screen to get the app instantly.

2. Turn on Bluetooth

Ensure **Bluetooth** is enabled on your phone so it can communicate with your watch.

3. Open the Moto Watch Lite App

Launch the app on your phone — it will automatically start searching for nearby devices.
When your **Moto Watch 120** appears, tap **"Add Watch."**

4. Confirm Your Watch

Select your **Moto Watch 120** when prompted.
Check the **last four digits of the MAC address** on your watch (visible by swiping up on the QR code screen) to make sure you're pairing the correct device.

5. Complete the Pairing Process

Follow the on-screen instructions in the app.
Once pairing is complete, you'll see a **"Pairing Success"** message.

Tips

- Keep your watch close to your phone and ensure it has enough battery before starting.
- Do **not** pair the watch directly via your phone's Bluetooth settings — use the Moto Watch Lite app instead.
- If pairing fails, restart both your phone and watch, then try again.
