Navigate Seamlessly with Moto 360: GPS & Google Maps

Inas B. - 2025-10-22 - Product Features

Take your navigation to the next level with **Moto 360**, featuring built-in GPS and smooth **Google Maps integration**.

Built-In GPS for Fitness & Beyond

- **Google Fit Compatibility:** Track your runs, bike rides, and walks directly on your Moto 360. The built-in GPS works independently, giving you precise location tracking without relying on your phone.

E-Compass for Directional Precision

- **Stay Oriented:** The Moto 360 includes a built-in e-compass, improving directional accuracy. Compatible with Wear OS apps, including the **Marine Commander Watch Face**, this feature ensures reliable navigation.

Google Maps Integration

- **Turn-by-Turn Directions:** While running Wear OS 2, your watch receives navigation updates from Google Maps on your paired phone. Start navigation on either device, and turn-by-turn directions appear on your watch, keeping your journey on track.

Supported Navigation Modes

- **Versatile Guidance:** Moto 360 supports walking, cycling, and driving directions, adapting to your preferred mode of travel.

Accessing Directions

- **Easy Navigation:** Simply start navigation on your Moto 360 or paired phone. Your phone shows the full route, while your watch provides timely turn-by-turn prompts.

 With Moto 360’s GPS and Google Maps, enjoy precise navigation and convenient tracking whether you’re exploring the city or logging your workouts.
