# Capturing Screenshots on Your Moto 360

Inas B. - 2025-10-08 - Product Features

Easily capture moments on your Moto 360 display with a few simple steps. Whether for sharing or keeping a record, screenshots allow you to save exactly what's on your watch screen.

**Step-by-Step Guide:**

1. **Enable Developer Mode on Your Android Phone:**
    - Open **Settings** on your Android phone.
    - Navigate to **System** or **About Phone**.
    - Tap **Build Number** multiple times until a message confirms Developer Mode is enabled.
2. **Open the Wear OS App:**
    - Launch the **Wear OS by Google** app on your connected Android device.
3. **Access the Menu:**
    - Tap the **three dots** icon in the top-right corner of the app screen.
4. **Capture the Screenshot:**
    - In the menu, select the **Screenshot** option or go through **Developer Options**.
    - Your Moto 360 display will be captured and saved.

Following these steps lets you quickly capture and share the screen content of your Moto 360 smartwatch.
