Moto360 3rd Gen and Wear OS 3.0 Compatibility

Inas B. - 2025-10-13 - Troubleshooting & Setup

Wear OS 3.0 is Google's latest smartwatch operating system, offering better performance, a unified platform merging Wear OS and Samsung's Tizen, enhanced health features, and an updated Google Assistant. While these updates improve the smartwatch experience, here's what it means for Moto360 3rd Gen users.

What You Should Know

1. **Feature Compatibility:**
   The Moto360 3rd Gen is *not currently compatible* with Wear OS 3.0, so the new features won't be available.

2. **App Experience:**
   Your favorite apps will still work, but over time some developers may optimize for Wear OS 3.0, which could create minor differences.

3. **Long-Term Usage:**
   Your Moto360 remains a reliable, stylish smartwatch — no urgent changes are needed.

4. **Ongoing Support:**
   Even as updates focus on Wear OS 3.0, we continue to provide support for Moto360 3rd Gen users.

What You Can Do

- **Enjoy your watch:** Continue using your Moto360 3rd Gen as you always have. There's no need to worry.

- **Stay informed:** Keep an eye on official updates for news, improvements, and potential future compatibility options.

In short: Your Moto360 3rd Gen is still a great smartwatch. While it won't get Wear OS 3.0 features, it remains fully functional, supported, and ready to keep up with your daily life.
