Music Control Made Easy with Your Moto Watch 40

Inas B. - 2025-10-10 - Product Features

The Moto Watch 40 makes controlling your music and media effortless. Whether you're exercising, commuting, or just relaxing, your watch can act as a convenient remote for the media playing on your connected phone.

How to Control Music

Once you start playing music on your phone, a music widget will appear on your watch. This lets you manage your media quickly with simple controls:

- **Play/Pause:** Tap to start or stop your music instantly.
- **Previous Track:** Go back to the track you were listening to.
- **Next Track:** Skip forward to the next song.

If the Music Widget Doesn't Appear

- **Check Bluetooth:** Ensure Bluetooth is on for both your watch and phone.
- **Confirm Active Media:** Make sure the media is actively playing on your phone and that a media notification is visible.

Once everything is set, your Moto Watch 40 becomes a handy on-the-go music controller, so you can enjoy your tunes without reaching for your phone.
